Import the Libraries

Team ID   :PNT2022TMID52124

Project Name:Digital Naturalist - AI Enabled tool for Biodiversity Researchers

  Numpy- It is an open-source numerical Python library. It contains a multi-dimensional array and matrix data structures. It can be used to perform mathematical operations on arrays such as trigonometric, statistical, and algebraic routines.

  Pandas- It is a fast, powerful, flexible, and easy to use open-source data analysis and manipulation tool, built on top of the Python programming language.

  Matplotlib- **Visualisation** with python. It is a comprehensive library for creating static, animated, and interactive visualizations in Python.

```
import pandas as pd
import numpy as np
 import matplotlib
   pyplot as plt
```
