Build a flask application

TEAM ID	PNT2022TMID52124
PROJECT NAME	Digital Naturalist - AI Enabled tool for Biodiversity Researchers

```
from flask
import Flask,
redirect,
render_template,
request
                app = Flask(_name_)
                @app.route('/', methods=['GET'])
                def index ():
                  #Home page
                  return render_template("template.html")
                  @app.route('/predict', methods =['GET','POST'])
                  def upload ():
                    # logic yet to be build
                    if request.method == 'GET':
                      return ("Here the logic is defined")
                    if request.method == 'POST':
                      return ("Here the logic is defined")
                if_name_ == '_main_':
                    app.run()
```
